

# Composite LINK Systems

## Computer Classroom Management System

The Composite LINK System allows trainers/instructors to have control over any trainee PC in the classroom. The instructor has the flexibility to launch his/her presentation to the class, keep an eye on the classes computer activity, share any trainee's screen with the class and more. Even integrate your iPad and Android tablets, overhead projector, laptop, whiteboard, document camera and digital microscope with our LINK System. The LINK System encourages classroom collaboration, progressive learning and provides instantaneous feedback with surveys and tests.

### LINK System Features

#### Send your presentation to your students' screens

Launches the instructor's PC image directly to students' screens in real-time, full-motion video. Your class sees your presentation right on their screen in front of them.

Instructor

Sit anywhere in the classroom and easily see every detail of what is being presented.

#### Gain Your Classes Attention

Project a blackened screen to student's monitors and immediately have their undivided attention.

Instructor

Instantly blank any or all of your student's screens. This works great when lecturing.

#### Keep an Eye on Your Classes Computer Activity

Instructor can monitor student's screens, detecting on-the-fly if students are having problems and needing assistance or if they are working on non-related class materials.

Instructor

View any student image or automatically scan the entire class.

#### Remote Keyboard/Mouse Control

Instructor's can help any student by remotely controlling the student's PC right from instructor's PC. Share any student's screen with the class encouraging classroom participation.

Instructor

This increases retention rates and allows you to cover more material in less time.

#### Projector Control/Laptop Compatible

Encourage classroom discussion by sending any student's screen to the overhead projector to share with the class. This works really well when working on class projects or assisting a student with a problem which you know multiple students are having difficulty solving. The LINK System can also send the instructor's screen to the projector or any input device including a laptop to the overhead projector.

#### Trainees Request Help

Discreetly trainees can electronically request assistance from the instructor. Trainees simply press the help icon on their screen and it automatically alerts the instructor they need assistance.

#### Instant Surveys & Testing Included

Easily gauge your classes knowledge of your material covered with our instant survey feature. Ask a question and your students will answer via their keyboard. Their responses will automatically appear on your instructor's LINK System touch screen. Immediately, you will see who understands the material and who requires further instruction.

#### Share Multimedia with your class

Utilize multimedia capabilities by sending tablet, DVD, and document camera images from the instructor's computer to all student monitors for picture perfect viewing. Simply press an icon and the image is sent directly to the students screens.

### DUAL MONITOR COMPATIBLE

Our Composite LINK System provides the ability for instructor's to take control of both monitors and project them directly to the students' dual monitors in real-time no delay. The dual monitor LINK System has all the capabilities of the single monitor LINK System. Dual monitors are becoming more and more popular with the reduced prices of LCD panels and monitors. These systems are used highly in flight training centers and U.S. military bases.

## AUDIO CONTROL TOO!

### Video/Audio Classroom Management

This is a very beneficial option that can be added to the Composite LINK System. Instructors who teach in a language lab love the fact that they can broadcast his/her audio to an individual student or the entire class. Also, using headsets instructors can have one-on-one conversations with students, listen to the student's voice and/or audio. Encourage classroom discussions by sharing any student's voice/audio with the class.

*"The ACS LINK System is the core technology for our Studio classroom. All of the other technology in the room works seamlessly with the LINK System—document cameras, video chat, smart boards, scientific instrumentation, etc."*

*Charles Abrams,  
Dept. of Physical Science & Engineering  
Truman College, IL*

Reliable	Powerful	Simple
<ul style="list-style-type: none"> <li>• Years of service through generations of PCs</li> <li>• Assembled with highest quality cables and electronics</li> <li>• Built by ACS, Made in U.S.A.</li> </ul>	<ul style="list-style-type: none"> <li>• Increases trainee retention rates</li> <li>• Keeps students on task</li> <li>• Eliminates classroom distractions</li> <li>• Integrate multiple video sources</li> <li>• Technology. Control. Results</li> </ul>	<ul style="list-style-type: none"> <li>• Extremely user-friendly touch console</li> <li>• Plug and play installation</li> <li>• Parts are easily identified</li> <li>• No technical knowledge required</li> <li>• No training necessary</li> </ul>

*"All is well with the LINK System. It is the best teaching tool I have ever used. We have new Smartboards in our classrooms but one of my students just yesterday said they prefer the LINK System for my demonstrations. I agree."*

*Lenny Baierwalter  
Bluffton High School, IN*

## LINK System Installation & Training

As an option, ACS provides professional installation and training services. A knowledgeable and well trained crew will come to your site and install the LINK System for you. They will make sure all is working well and have your system up and running in no time. They will provide training for anyone involved with the LINK System. Training is suggested for your instructors, professors, administrators and technical department who may be responsible for the LINK System.

*"The LINK Systems are still going strong, and if asked, can highly recommend them. However, with our ever decreasing budgets, I doubt we'll be able to upgrade any time in the near future." "The big problem with making a good product (LINK System): They last too darn long."*

*Thomas Jung  
San Mateo Adult School, CA*

## LINK System Warranty & Free Tech Support

The LINK System comes standard with a one (1) year warranty on all parts and labor repaired at ACS facilities. Toll-free technical support is provided at no additional cost for as long as you own the system.
