

LINK Stylus

The LINK Stylus is a powerful and easy to use on-screen annotation tool. Easily write over any application that is active on your monitor(s). Instructors can circle areas of special importance during a lesson and write notes on the screen with an assortment of colors. A useful tool for presenters who need to add emphasis to their demonstration allowing their audience to better understand their message.

LINK Stylus Features:

Draw, Save & Print

Use a variety of colors and widths. Add notes-on-the-fly as you instruct, then save and print for future reference.

Circle, Underline & Highlight

Emphasize important details to grab your audiences' attention.

Add Pizzazz to Your Message

Insert arrows and bullets to draw attention to areas of interest.

Erase

Need to remove any annotation or inserted bullet you made on the screen — simply use the eraser and all the illustrations are removed.

Flashlight Mode

Instantly black out the screen and only display areas of interest with our flashlight mode.

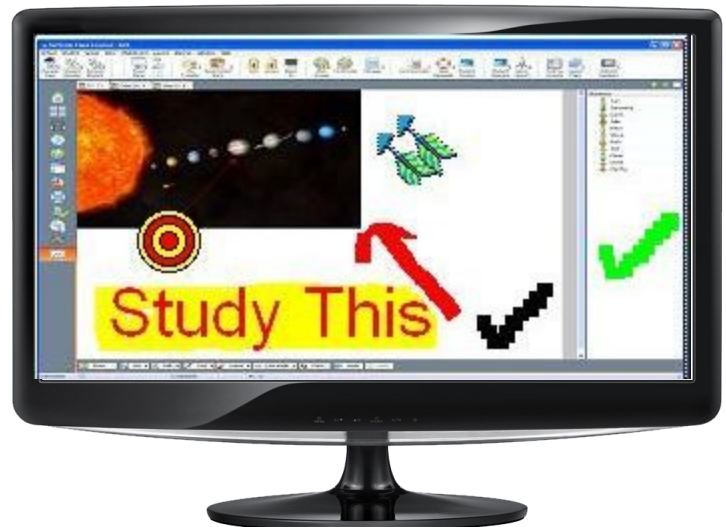

Supports Dual Monitors

Draw, Insert text, highlight, insert arrows on either screen or both screens. The LINK Stylus software supports dual monitors.

Dynamic Palette of Colors:

Our LINK Stylus palette consists of rich, vibrant colors for capturing the attention of your audience.

- **Selection of 8 bright colors**
- **Highlight, Transparent & Fill Mode**
- **Write anywhere on the screen**

Emphasize your key points using our array of annotation tools:

- **Circle, Draw & Underline**
- **Bullets & Directional Arrows**
- **Insert text anywhere on the screen**

When you are finished annotating you may clear all your comments by selecting the 'clear drawing' command from our LINK Stylus menu.
