Applied Computer Systems, Inc. has more than 40 years of experience providing easy to use computer class management solutions. SoftLINK with Assist is another valuable teaching tool designed specifically for those who teach in a MAC or LINUX environment. Instructors can remotely monitor/control any or all computers throughout their classroom/building/campus. Assist provides remote access to the students' monitors, keyboards, and mice.

INSTRUCT, VIEW & SHARE

— Monitor all student screens from your computer with scalable thumbnails of each desktop.

— Take control of the student's screen, keyboard and mouse and provide assistance when needed.

— Share any student's MAC screen with the class. Available only to Instructor's running Windows.

SHOW, BLANK, WEB CONTROL

— Effectively deliver engaging presentations by broadcasting the instructor's screen to the students' desktops.

— Blank student screens to gain attention.

— Remotely Power On/Off computers from desktop.

— Manage internet access and set website blocks.
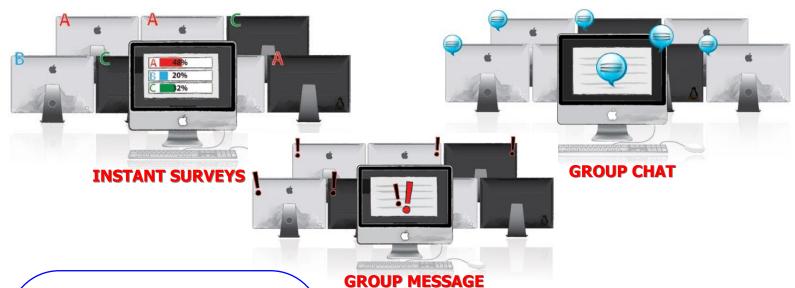

MAC & LINUX Best Class Management Software

COMMUNICATE WITH STUDENTS & GAUGE YOUR STUDENTS COMPREHENSION

- **Group Chat** share ideas and encourage classroom collaboration by conducting on-screen discussions that include the entire class or a few selected students.
- **Send Message** to an individual student or the entire class which appears on the student's desktop and can't be ignored.
- **Instant Surveys** ensure students have understood the content covered during the lesson by polling them for instant feedback, collect and display results instantly.

TECHNICIANS ULTIMATE TOOL

The Assist 'Support Tool' can supply the technicians will all the system data they need to help diagnose and resolve the problem. The Support Tool is a small utility which is installed on each computer. With one click the problem machine is interrogated and the system files, processes and log files are saved in a file that can be supplied to the IT technician.

The Support Tool is included at no extra charge. It reduces system downtime and keeps the machines up and running.

CONNECTIVITY & PERFORMANCE

Delivering secure connectivity with student machines across both wired and wireless networks, Assist can be easily configured to locate 'students' wherever they may be and without compromising network performance:

- Wide range of options for connecting to student machines: assign machines to a specific room; or, dependent on the naming convention used for machines, a fixed list of machines or match by partial machine name.
- Locate machines across any number of TCP/IP subnets

SYSTEM REQUIREMENTS:
Mac: Processor: Intel Only
Operating System: MAC OS X version 10.9 and later (Mavericks, Yosemite and El Capitan).

Applied Computer Systems, Inc. (ACS) has been in business since 1971 providing computer classroom management systems. ACS has more than 40 years of experience designing, engineering and selling these solutions to businesses, universities, community colleges, government entities, military and the K-12 sector. ACS provides both software and hardware products for computer student management. We are your one-source the best computer class instructional and management tools. You will find we are easy to work with and we treat every customer as if they were our first.

Customer Satisfaction and Service are our #1 priority.
