# SoftLINK

## for

## Google Chrome™

**Applied Computer Systems, Inc.** is pleased to offer SoftLINK for a Google Chromebook environment. It delivers the tools you need to help maximize the effectiveness of computer-led teaching. **Teachers can monitor the student Chromebooks using a <u>Windows computer</u>, <u>Mac</u> or a <u>Chromebook</u>.**

The Tutor App for Chrome can be installed on teacher machine running Google Chrome OS. The teacher can then connect to each student Chromebook* enabling you to monitor and interact with students.

*The Student App extension for Google Chrome needs to be installed on each student Chromebook.
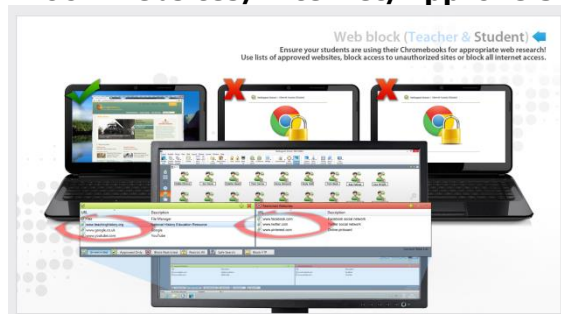

## SoftLINK Chromebook Key Features:

- View a crystal clear thumbnail of each student machine in a single view

- Click on a thumbnail to discreetly view screen activity on a selected Chromebook.

- Remote Control. As well as discreetly monitoring the students screens (Watch Mode), teachers can interact with the students' desktops with real time remote control (Share Mode). Ideal for providing 1:1 help and support to students as needed.

- Broadcast teacher's screen to student desktops

- Send an instant survey or request for feedback to each student and display results in real-time

- Send an attention-grabbing message or instruction to each student machine

- Block all Internet access - Launch a website on the Student Chromebook - Close a website on Chromebook

- History Log of Websites Visited, History Log of Applications Used, Shows Dates & Times of Sites Visited & how long they were on a site or used an application

- Teacher can open a discussion session with selected or all students, enter their comments and share with the rest of the class

- Lock the student's mouse and keyboard when instructing

**Show Instructor's Screen To All**

**Block Websites/Internet/Approve Sites**
